

Curriculum Vitae

Alexander Adu-Sarkodie

<https://www.linkedin.com/in/alexander-adu-sarkodie-063b4b4a/>

<https://github.com/kukuu?tab=repositories>

With over twenty years of experience in Computing, Alexander is an accredited and practising Full-stack software engineer. He is a Global Award Winner - <https://github.com/kukuu?tab=repositories> . His background is in Computer Systems Engineering & Data Communications (MSc). Alexander has a previous background in Mechanical Engineering (MSc).

He is also a seasonal Lecturer in Business Computing and Digital Transformation.

Achievement

A result oriented Development Leader with extensive hands-on/hands-off experience, Alexander's duties include technical leadership, end-to-end software life cycle development, architecture, strategic directions, capacity planning, development initiatives for project planning, and execution, timeframes for review and releases, developing engineering talent and academy training, mentoring, and coaching.

Other duties are accountable for the technical quality of the output of Agile cross-functional teams, code quality, test coverage, technical debt and overall quality of the systems and operational excellence of the CI/CD pipeline.

His achievements include:

- Honoured as amongst the **Top 50 UK Technology Leaders** in the Industry 2023.
- Successful delivery of multi-million FIFA+ World Cup 2022 notification cloud-based SaaS platform that transmitted rich interactive media to millions of global audiences. Working as Head of Development.
- Co-founder startup <https://www.azzotto.com/> . A digital broadcasting service in News, Entertainment, Wealth Management, Sports, and Streaming.
- As Lead Technical Architect at Zaizi, helped the Home Office transform the following communication platforms: <https://www.gov.uk/> and <https://www.gchq.gov.uk/> for the UK Government and its citizens. Developing a new cloud-secure scalable architectural platform. Features included Cybersecurity awareness for businesses, providing strategies and support in securing personal data, and provisioning a secure communication network between the government and its citizens, including cyber-security alerts.
- Responsible for integrating the "Send to a Friend" module for the BBC iPlayer. Then a member of the technical team that started digital broadcasting and transformations on the Internet at the BBC - a pioneering revolution that changed the country. Alexander was the Lead Developer for the BBC flagship ONE SHOW program.

- Architect and Development Consultant for SONY PlayStation-2017 multi-media game digital platform.
- As Software Development Manager at Marks & Spencer recruited and assembled its first in-house high-performance Engineering and Academy teams for its UK and international teams to support the business.
- Written White Papers for W3C & Accessibility Guidelines and BitCoin Mining.
- Line managed, mentored and coached near and offshore teams in the UK, Austria, Spain, India, the US, Argentina, Estonia and Romania.
- Interview London Technology Forum - https://www.linkedin.com/posts/alfiegeorge-whattam_londontech-londontechnology-techlondonugcPost-6694141986187833344-vaOF

Project Portfolio

- <https://www.azzotto.com/> : Azzotto is social interaction and global inclusive community Digital Broadcasting Platform that provides a complete set of user experiences in News, Entertainment, Wealth Management, Stream, Academia and Advertising.
- Home Office
 - Ministry of Defence - <https://www.gov.uk/government/organisations/ministry-of-defence>

- Ensuring software is delivered in good condition to Product and Business for review by QA.
- People's management and Hiring
- Working with external clients and key stakeholders.
- Writing and maintaining technical documentation and onboarding
- Keeping abreast of new technologies and improving internal systems

Technologies:

OWASP, TOGAF, JavaScript, AWS Stack, NodeJS, Next.JS, REACT/REACT HOOKS, REACT Native, TypeScript, Serverless, LAMBDA, REDIS, GCP, PostgreSQL, ElasticSearch, Mobile(KOTLIN, SWIFT), REDUX, REST APIs, GraphQL, Jest, React Testing Library, Cypress, JMeter, Webpack, CSS Frameworks, FFMPEG, TailwindCSS, Agile, SENTRY, Sonar Cloud, Docker, TDD/CI/CD, Bitbucket, Responsive Design, JIRA, SLACK.

April 2019 - May 2020

Chief Technological Officer

Bearings Point Media, London

Kemp House, 160 City Road - London EC1V 2NX

Responsibilities:

Working as a hands-on CTO, my duties included:

- Accountable for end-to-end software delivery, managing the overall technical quality of the output of agile development teams, including functional, code quality, test coverage, technical debt and overall quality of the system design and solution architecture.
- Code writing, people's management, guidance, architectural and strategic engineering direction, capacity planning, technical leadership, development initiatives for project execution, timeframes for review and releases, developing engineering talent for social media engagement app, coaching and mentoring. Keeping abreast of new technologies and improving internal systems.
- Working closely with UX and Product Owners to define user journeys, interface features and also algorithms for designs, and wireframes. Ensuring designs are extensible and comply with standards and follow the principles of KISS. Mobile-first. Build prototypes. Engage AB/MVT.
- Ensuring technical documentation is constantly reviewed to support the development and training, and onboarding of new Engineers.

Product - The ReadApp:

The app offers a reading Lounge for groups, where each Lounge provides content central to its interests and invites or accepts requests to access and pay for content in its community. Members pay to read and can chat and share comments in a discussion thread. The variety of lounges envisaged, caters to different interests and provides a space for every reader to find an armchair they feel comfortable in. Other features includes a NEWS API, Dashboard, Blogs, Editorials and Notification updates.

Technologies:

NodeJS, JavaScript, REACT/REACT Native, REDUX, Angular, TypeScript/NextJS, PostgreSQL, Digital Ocean, GraphQL/Apollo/HASURA, Docker/Kubernetes, TDD/Git/GitHub/CI/CD/JIRA/SLACK, Sentry/STRIPE, SIGIL/InVision, Android/iOS

August 2018 - May 2019

Technical Architect - Zaizi

Responsibilities:

The platform provides strategies and support in securing businesses and personal data, provisioning a secure communication network between the government and its citizens, including cyber-security alerts to espionage.

Working as Principal Technical Solution Architect my responsibilities included a balance of the following:

- End to end software development, Code Writing, Technical Leadership, Architecture.
- Line Management (near and off shore), providing strategic planning, development initiatives for project execution, timeframes for review, releases, and driving best practices.
- Leading cross functional Agile teams in the DevOps area.
- Guiding and supporting Release plans and Discovery phases with internal and external stakeholders
- Maintain technical debt backlogs and ensure that they are continuously progressed.
- Capacity planning - Leading SPRINT Planning, estimation and responsible for enforcing code reviews, establishing best practices, helping to make the right technology choices, and taking responsibility for the code base and builds.
- Ensuring provision of credible and scalable development platforms : Supports, Automation, Reproducible, Elastic, Smooth, Traceable, CI/CD, Automated Testing, Quality Assurance, and Lean Agile principles in the Software Development Life Cycle.
- Reporting on key delivery metrics including project progress and resource usage to business.
- Meeting deadlines with scope, budget, maximising efficiency and managing relationships and performance of the Software Engineering teams.
- Managing product backlog items (PBLi), Agile process and technical resources within project schedule, and working closely with Product Owner and Delivery Lead to gather and prioritise functional and non-functional requirements.
- Keeping abreast with trends in changing technologies landscape to refine the engineering teams, governance and making decisions for business to achieve its goal and becoming competitive.
- Responsible for assigning engineers to teams, Hiring, Training & Development. Career counselling managing expectations, 1-2-1, appraisals, mentor-

ing and coaching Software Engineers. Managing expectations, setting KPIs for the engineering teams.

- Working with Platform and Release Management teams to ensure completion of process life cycle and delivery of product, lead trouble shooting sessions, and engage with customer concerns, and after care support.

Technologies:

NodeJS, Express, Object Oriented Programming, JavaScript, JavaScript Frameworks, Isomorphic JavaScript, REACT, NEXTJS, REDUX, Angular, Storybook, GraphQL, Gatsby, Webpack, Web-services, REST, Websocket, APIs, PostMan, Curl, Authentication & Access Control (JWT), TDD, XP, BDD, Automation, CI/CD,, Jest, Enzyme, Mocha, Chai, Gulp, Containerisation (Docker/Kubernetes), Responsive Design, Mobile First, SASS, Style Components (CSS-in-JS), PostCSS, HTML5, CSS3, Media Queries, Cross Browser Compatibility, PWA - offline support, Databases - MySQL, NoSQL (MongoDB). Crafter (Headless CMS), DRUPAL, AWS, SOA, Micro-services, Event Driven/Composition, Architecting for High Availability, Zeplin, JIRA.

October 2015 – July 2018:

Contract - Full stack

Developing and supporting digital transformation programmes, digital initiatives and service for the GDS, IT, eCommerce, Banking, Media, Education, Wellbeing and Broadcasting.

- SONY
- Ericsson
- Flix Premiere

Technologies - <https://github.com/kukuu/siliconlabs/blob/master/README.md>

August 2012 – September 2015

Software Development Manager: September 2014 - September 2015

Marks and Spencer - London

Responsibilities:

Delivered the technical framework, and initiative for the digital transformation of Marks and Spencer from a coupled monolithic to a scalable omnichannel platform while ensuring the continuation and enhancements of services.

As a member of the Strategic Leadership Technical Team at Marks and Spencer's e-commerce platform, my responsibilities included:

- Lead Developer iPad, omnichannel, Checkout and Loyalty schemes platforms
- Technical leadership across multiple Agile cross-functional teams. Hands-on development.
- Managing relationships across project teams within the business portfolios.
- Managing the Performance of the Software Engineering team. Including off-shore.
- Responsible for ensuring onboarding, Training & Development of the Software Engineering Team.

AGILE, Continuous Integration.

Jan. 1999 - to date:

Visiting Lecturer – Business Computing - The City Literary Institute (<http://www.citylit.ac.uk/>)

Subject Area: JavaScript and JavaScript Frameworks

Coverage

- Programming & Emerging Technologies
- Digital Transformation & Best Practices

Qualifications

- MSc Telematics (Computer Systems Engineering, Data Communications and Network Engineering.) - School of Electrical & Electronic Communications, Dept. of Computer Science, Middlesex University, London.
- MSc Engineering - Belarus State University, Minsk.
- Diploma Russian Language - Minsk, CIS
- Teacher Training Certificate (Adult Education) - UK. The City Lit Institute - London.

Membership Professional Bodies

- Member British Computer Society (MBCS - UK)
- Member Institute of Learning (MifL - UK)
- Associate Member Institute of Engineers (AMIEng - UK)

Other - Bi-lingual, fluent in English, Russian and conversational French.
